About the Property

A waterfront property with breathtaking views! The structure sits close to the shoreline, offering unobstructed views of the water, but the home itself is in original condition and has the nostalgic feel of old-school shore vibes! The true value of the property lies in its prime location direct water access, scenic surroundings, and the opportunity to build a custom residence tailored to take full advantage of the setting. Ideal for buyers looking to start fresh and create a new home in a highly desirable waterfront setting. Sitting on a double lot, enjoy some space between neighbors, and expand the existing footprint of the home. The dock will also require replacing, hence, the massive price reduction. The views are breathtaking, and the potential is endless! PLEASE CONTACT WENDY KREI ...
